

VOLVO GROUP REPORT ON THE FIRST QUARTER 2015

- » In the first quarter net sales amounted to SEK 74.8 billion (65.6). Adjusted for currency movements and acquired and divested units sales decreased by 1%.
- » Operating income amounted to SEK 7,066 M (2,588) excluding restructuring charges of SEK 229 M (318). Operating income includes a positive impact of SEK 2,471 M from the sale of shares in Eicher Motors Limited. Currency exchange rates had a positive impact of SEK 1,282 M.
- » Operating income excluding restructuring charges and the capital gain from the sale of shares amounted to SEK 4,595 M (2,588), corresponding to an operating margin of 6.1% (3.9).
- » Operating cash flow in the Industrial Operations amounted to SEK –1.7 billion (–9.0).
- » Net financial debt in the Industrial Operations amounted to 23% of equity.
- » Truck order intake increased by 3% while order intake of construction equipment decreased by 24%.
- » Acquisition of 45% of Dongfeng Commercial Vehicles completed.

CEO'S COMMENTS

Improved profitability

As we summarize the first quarter of 2015, we can see that the effects of our strategic efficiency-improvement program continue to generate results. I am particularly satisfied that we in several areas of the Group have been able to improve margins, despite a negative market mix with significantly lower volumes in Brazil for trucks and in China for construction equipment.

For the Group, we are reporting a clearly improved first quarter for 2015 in terms of both operating margin and cash flow. If we exclude restructuring charges and the effect of the sale of shares in Eicher Motors, the Group's operating margin rose from 3.9% in the first quarter of 2014 to 6.1%, which is an improvement of the operating income by 78% to SEK 4.6 billion. Our work to improve our financial position continues and it is thus gratifying to be able to see that our operating cash flow improved. In the first quarter, which is normally seasonally weak, operating cash flow for the industrial operations amounted to SEK -1.7 billion, an improvement of SEK 7.3 billion.

During the quarter, we sold a total of slightly more than 48,000 trucks, which is about as many as in the first quarter of 2014. The developments in the various markets followed the trends from the end of 2014; North America remains strong while South America, particularly Brazil, has continued to weaken. In Europe, demand is largely unchanged, but with a positive underlying trend mainly in Southern Europe and the UK.

Although the number of trucks sold did not increase, the truck operation's underlying operating income doubled to SEK 3.8 billion and the operating margin went from 4.1% to 7.3%. The strong increase is mainly due to a considerable improvement in profitability in North America, positive effects of the efficiency program and favorable exchange rates.

Unfortunately, weak demand continued for Volvo CE. In particular, sales were impacted by the continued downturn in the important Chinese market, which was down by half compared with the year-earlier period. In total, the number of equipment deliveries declined by more than 30% during the quarter.

Volvo CE is working to adapt to lower volumes and is implementing a series of measures to reduce its cost level. Our efforts could not fully offset the significant drop in volumes and the operating margin came in on 2.8%.

Buses improved the profitability, despite delivering 11% fewer buses. Volvo Penta also had a positive quarter in terms of both volume and operating margin. The positive trend in the customer finance business continued in the first quarter with an improved profitability.

The review of the Group's IT operations is now complete. We will keep application development and maintenance of business critical systems and accelerate efficiency improvements in this part of the operation. For the external business and the operation of our IT infrastructure we have initiated a process to find an external partner. Our assessment is that this will be more cost-effective for the Group.

2015 is the year in which we will see the combined effects of the product launches carried out in 2013 and the cost reductions that were implemented in 2014. Even if we still have many activities to implement also in 2015, the earnings improvement we saw in this quarter shows that we have taken another step in improving the profitability of the Group.

Jan Gurander
Acting President and CEO

FINANCIAL SUMMARY OF THE FIRST QUARTER

Net sales

In the first quarter of 2015, net sales for the Volvo Group amounted to SEK 74,788 M (65,646). Adjusted for changes in currency exchange rates net sales were down by 1% compared to last year.

Operating income

Operating income amounted to SEK 6,837 M (2,269), including a capital gain of SEK 2,471 M from the divestment of shares in Eicher Motors Limited as well as restructuring charges of SEK 229 M. Excluding these two items, operating income amounted to SEK 4,595 M (2,588), corresponding to an operating margin of 6.1% (3.9).

Compared to the first quarter of 2014, gross income was positively impacted by favorable currency development and an improvement in the aftermarket business, which was partly off-set by lower sales volumes of new vehicles and equipment and a negative market mix.

Operating expenses for research and development, selling- and administrative expenses increased by SEK 272 M. The increase is a result of unfavorable currency development amounting to SEK 880 M and lower capitalization/higher amortization of research and development amounting to SEK 244 M compared the first quarter of 2014. Excluding these two effects, operating expenses were reduced by SEK 852 M compared to the first quarter of 2014.

Operating income includes a positive impact of SEK 281 M from capital gains relating to divestments of real estate reported in the segment Corporate functions and other and a negative impact from a provision for expected credit losses in China in amount of SEK 149 M in Volvo CE.

Favorable currency development impacted operating income in an amount of SEK 1,282 M compared to the same quarter last year, including a negative SEK 208 M in Trucks relating to a devaluation in Venezuela.

Consolidated income statement, Volvo Group SEK M	First quarter

Other markets		4,683	4,546	3
Volvo Group		74,788	65,646	14

Net financial items

Compared with the first quarter of 2014, net interest expense increased due to higher financial liabilities as a result of the payment of SEK 7 billion for the 45% ownership in Dongfeng Commercial Vehicles and higher interest rates on outstanding debt. Net interest expense amounted to SEK 501 M (445). Net interest expense in the fourth quarter of 2014 amounted to SEK 439 M.

Other financial income and expenses was negatively impacted in an amount of SEK 319 M (positive SEK 20 M) from realized result and unrealized revaluation of derivatives.

Income taxes

The tax expense amounted to SEK 1,731 M (586). The tax expense was negatively affected by a valuation allowance and revaluation of deferred tax assets in Japan in an amount of SEK 675 M as a result of a changed corporate tax rate and stricter conditions for utilization of tax-loss carry forwards. The capital gain on the divestment of shares in Eicher Motors Ltd is a non-taxable income affecting the tax rate positively.

Income for the period and earnings per share

Income for the period amounted to SEK 4,236 M (1,141). Diluted earnings per share amounted to SEK 2.09 (0.53).

Operating cash flow in the Industrial Operations

In the first quarter of 2015, operating cash flow in the Industrial Operations amounted to SEK -1.7 billion (-9.0). The improvement versus last year is primarily related to higher operating income and a lower seasonal build-up of working capital.

Volvo Group financial position

On March 31, 2015 total assets in the Volvo Group amounted to SEK 403.5 billion, an increase of SEK 20.6

billion, since year-end 2014, mainly as an effect of the acquisition of 45% of Dongfeng Commercial Vehicles of SEK 7.0 billion and currency movements related to revaluation of assets in foreign subsidiaries of SEK 13.1 billion.

By the end of the first quarter net financial debt, excluding provision for post-employment benefits, in the Industrial Operations amounted to SEK 16.6 billion, an increase of SEK 6.7 billion compared to the end of the year 2014 and equal to 23.1% of shareholders' equity. Including provisions for post-employment benefits, the Industrial Operations net financial debt amounted to SEK 37.4 billion which is equal to 51.9% of shareholders' equity. The increase is mainly explained by the acquisition of 45% of Dongfeng Commercial Vehicles, the re-measurement of defined benefit pension plans of SEK 3.7 billion, as an effect of lower discount rates, negative operating cash flow of SEK 1.7 billion and negative currency effects, partly reduced by the positive cash flow after net investments of SEK 2.6 billion from the disposal of shares in the listed Indian company Eicher Motors Limited.

At the end of the first quarter the shareholders' equity for the Volvo Group amounted to SEK 82.3 billion compared to SEK 80.0 billion at year-end 2014. The equity ratio was 20.4% compared to 20.9% on December 31 2014. On the same date the equity ratio in the industrial Operations amounted to 24.8% (25.7).

Number of employees

On March 31, 2015 the Volvo Group had 104,382 employees including temporary employees and consultants, which was a decrease of 3,260 employees compared with March 31, 2014.

During the first quarter of 2015, the number of white-collar employees and consultants was reduced by 605 as a consequence of the efficiency program.

Number of employees	Mar 31 2015	Mar 31 2014	Dec 31 2014

TRUCKS

Improved profitability on flat volumes

- » Strong demand in North America and Western Europe – weak markets in South America
- » Order intake increased by 3%, book-to-bill of 117%
- » Operating margin excluding restructuring charges and the sale of shares in Eicher Motors Limited amounted to 7.3% (4.1)

Market development

During the first quarter, demand continued to develop favorably in North America and parts of Europe, while demand in South America, parts of Asia and Russia continued to decline.

During the beginning of 2015, Northern and Eastern Europe is showing modest growth whilst markets in the UK and in Southern Europe is showing a more stable upswing. For 2015, the total market for heavy-duty trucks in Europe is expected to be on a level of about 240,000 trucks (unchanged forecast).

The North American retail market for heavy-duty trucks is expected to increase to a level of about to 310,000 vehicles (unchanged forecast). A robust manufacturing environment, along with a favorable US GDP development and rising freight demand have combined given positive effects on first quarter retail sales.

Truck demand in South America has been affected by lower GDP growth and lower business activity across the continent. In Brazil, the largest market in South America, demand is currently low as a result of a weak economy and changed financing conditions (increased interest rates and down payment conditions) in the government's subsidized financing program for commercial vehicles

(Finame). For 2015 the total market for heavy-duty trucks in Brazil is expected to decline to a level of about 55,000 trucks (previous forecast 75,000 trucks)

The total market for heavy-duty and medium-duty trucks in Japan was on about the same level as last year. For 2015, the market for heavy-duty and medium-duty trucks is expected to be on a level of 90,000 vehicles (previous forecast 85,000 trucks).

Order intake

Total net orders increased by 3% in the first quarter compared with the year-earlier period. Net orders of 56,770 trucks and deliveries of 48,326 trucks resulted in a book-to-bill ratio of 117% for the Group's wholly-owned operations.

Orders in Europe rose by 22% orders with a continued positive trend from low levels for Renault Trucks. In North America orders continued to improve with an increase of 18%.

Orders in South America declined by 64% as a result of low economic activity and decreased business confidence.

Compared with the first quarter of 2014 orders in Asia increased by 1%.

Dongvo (Hangzhou) Truck Company (UD)	50	19	163
Total volumes	67,617	63,016	7

Deliveries

In the first quarter of 2015, truck deliveries rose by 19% in Europe and by 23% in North America. Deliveries in South America were down by 67%. In total the Volvo Group's wholly-owned operations delivered 48,326 trucks, which was 1% more than in the first quarter of 2014.

Net sales and operating income

During the first quarter of 2015, the truck operation's net sales amounted to SEK 51,657 M, which was 18% higher than in the first quarter of 2014. Adjusted for changes in exchange rates net sales increased by 3%.

The truck operations operating income in the first quarter improved to SEK 6,246 M (1,798) excluding restructuring charges of SEK 127 M (318). Earnings in the first quarter of 2015 included a capital gain from the sale of shares in Eicher Motors Limited amounting to SEK 2,471 M.

Excluding the capital gain and restructuring charges operating income amounted to SEK 3,775 M (1,798), corresponding to an operating margin of 7.3% (4.1).

The underlying improvement compared with the first quarter 2014 was a result of a favorable currency development, an improvement in the aftermarket, improved earnings in North America and somewhat higher profitability in Europe. This was partly offset by significantly lower earnings in South America.

Operating expenses were reduced in local currencies, however this was offset by unfavorable currency movements.

Changes in currency exchange rates had a positive impact on operating income of SEK 1,099 M compared to the first quarter of 2014, including a negative impact of SEK 208 M from a devaluation in Venezuela.

CONSTRUCTION EQUIPMENT

Continued market decline in China

- » Chinese market more than halved
- » Volvo CE's total deliveries decreased by 33%
- » Restructuring program according to plan

Market development

The Chinese market has been in decline since March 2014 and this continued in the beginning of 2015 with a decline of more than 50% compared to the preceding year. This was mainly caused by continued lower levels of economic activity, lower machine utilization, and construction projects and mining activity remaining soft.

In Asia, excluding China, the total market decreased in the period, mainly driven by decline in Japan, South-East Asia and India.

Through February 2015 the European market was down by 12%, mainly driven by a sharp drop in the Russian market as well as slowdown in the French market. The UK and Germany are still growing.

The North American market continued to grow, primarily in the segment for compact equipment. The decrease in South America was mainly caused by weak economic development and low business confidence in Brazil.

Deliveries

In the first quarter, deliveries decreased by 33% compared

to the same period in 2014, mainly driven by lower demand in China impacting both Volvo and SDLG brands.

Order intake

In the first quarter of 2015, net order intake was 24% lower than in the same quarter last year mainly driven by China and North America.

In North America order intake was down 13% mainly driven by lower sales of products in the product ranges where it has been announced to end Volvo branded production, prebuying in the fourth quarter of 2014 ahead of new emission regulations and lower sales to dealers for their rental fleets.

In Europe, order intake was 4% higher than last year driven by good order intake in markets such as the UK and Germany and increased demand for Volvo branded backhoe loaders and motor graders ahead of the announced phase-out. However, the growth was partly offset by a sharp decline in the Russian market, especially impacting sales of SDLG branded machines.

In South America order intake was 3% above 2014,

Total market development	Year-to-date Feb.		
	2015	Forecast 2015	Previous forecast

Volvo	10,805	11,747	(8)
SDLG	3,887	7,494	(48)
Of which in China	3,135	6,477	(52)

despite the declining market. This is mainly due to targeted sales programs as well as increased sales of SDLG machines.

Order intake in Asia was 37% lower than last year mainly driven by the continued sharp slowdown in China, impacting both brands.

Net sales and operating income

In the first quarter of 2015, net sales decreased by 5% to SEK 12,737 M (13,371). Adjusted for currency movements net sales decreased by 22%.

Earnings were negatively impacted by lower sales volumes, a provision for expected credit losses (SEK 149 M) and lower earnings in China. This was partly offset by a

favorable product mix in Europe and North America as an effect of a targeted sales activity as well as lower operating expenses. Excluding restructuring charges of SEK 75 M (0) the operating income was SEK 352 M (647) corresponding to an operating margin of 2.8% (4.8). Currency exchange rates had a positive impact of SEK 157 M on operating income compared to the first quarter in 2014.

Capacity utilization was low in China as a consequence of significant cutbacks in production in order to adapt to declining sales volumes and to control inventory levels.

The restructuring program that was launched in November 2014 is developing according to plan.

BUSES

Positive result in the quarter

- » Improved earnings on lower volumes
- » Order intake increased by 53%
- » Volvo 7900 Electric Hybrid in commercial service in Stockholm, Sweden

The European market shows a slight improvement and the Asian market is slowly recovering. In South America, the Brazilian bus market is negatively affected by the weak economic development and stricter terms in the government subsidized financing program Finame. In North America, the coach and commuter markets continue to improve.

Volvo Buses delivered 1,584 buses during the first quarter 2015, compared to 1,775 units in the first quarter of 2014, a decrease of 11%. Order intake in the first quarter totaled 2,101 buses and coaches, which was 53% higher than last year. Key orders in the quarter are 325 buses to Dubai, 150 to Egypt and 175 to Brazil. The Volvo 7900 Electric Hybrid started commercial service in

Stockholm, Sweden. This is the second traffic start of the Electric Hybrid, which was launched in September 2014.

Net sales in the first quarter increased by 41% to SEK 4,748 M (3,367). Adjusted for currency fluctuations, sales increased by 21%. Buses reported an operating income of SEK 104 M (36). The operating margin was 2.2% (1.1). Earnings in the quarter were affected by a positive currency development and a somewhat improved aftermarket business. However, production disturbances in one of the plants continued to hamper the result in the first quarter. Measures are implemented to correct the situation. Compared to the first quarter of 2014, operating income was positively impacted by currency exchange rates in an amount of SEK 142 M.

VOLVO PENTA

Good sales and earnings improvement

- » Operating margin of 13.0% (8.4)
- » Sales growth in all markets and segments
- » Launch of new Forward Drive at Miami Boat Show earns innovation award

The market for marine leisure engines remains unchanged, with some positive signs at European and American boat shows. At the Miami Boat Show, Volvo Penta Forward Drive received the National Marine Manufacturers Association Innovation Award and the new gasoline range of marine commercial engines was also well received. The market for marine commercial engines is lingering on low levels. For the versatile industrial engine markets, there are mixed signs, but sales are increasing.

The volume in the total order book on March 31, 2015 was 7,517 units (4,376).

Net sales in the first quarter of 2015 increased by 25% compared to last year and amounted to SEK 2,250 M

(1,804). Adjusted for exchange-rate fluctuations, net sales increased by 13%. Sales in the first quarter were distributed between business segments as follows: Marine SEK 1,404 M (1,127) and Industrial SEK 847 M (677).

Operating income amounted to SEK 292 M (151) excluding restructuring charges of SEK 16 M (0). The operating margin excluding restructuring charges was 13.0% (8.4). Earnings were positively impacted by currency effects and increased volumes. Compared with the first quarter of 2014, operating income was impacted positively by changes in currency exchange rates in an amount of SEK 115 M.

VOLVO GROUP'S CUSTOMER FINANCE

Strong results

- » Profitable portfolio growth
- » Continued good portfolio performance
- » Improved profitability

The customer finance business recorded strong levels of new business volume and the credit portfolio reached an all-time high during the quarter. This profitable growth, along with good portfolio performance, generated improved results for the quarter.

The gross credit portfolio increased on a currency-adjusted basis by 7% when compared to the first quarter of 2014. The vast majority of the portfolio continued to perform well highlighted by strong performance in North America and most of Europe.

Strong portfolio performance, together with strict pricing discipline and cost control lead to improved operating income of SEK 474 M (395). The credit reserves have

been increased reflecting tougher business conditions in Brazil.

In March, Volvo Financial Services successfully completed an asset-backed securitization program. Under the terms of the transaction, SEK 7.0 billion of securities tied to US-based loans on trucking and construction equipment assets were issued. During the quarter, Volvo Financial Services syndicated approximately SEK 1.4 billion of the credit portfolio across a number of markets, effectively reducing concentration risks and freeing up credit capacity to support sales.

IMPORTANT EVENTS

Completion of the acquisition of 45% of Dongfeng Commercial Vehicles

On January 5, 2015 AB Volvo announced that it had completed the acquisition of 45% of the Chinese automotive manufacturer Dongfeng Commercial Vehicles Co., Ltd (DFCV). The purchase consideration amounted to RMB 5.5 billion. DFCV includes most of Dongfeng's operations in heavy- and medium-duty commercial vehicles. The transaction strengthens the Volvo Group's position in medium-duty trucks significantly while the Group will become one of the world's largest manufacturers of both medium- and heavy-duty trucks.

Volvo sold holding in the listed Indian company Eicher Motors Limited

On March 4, 2015 the Volvo Group announced that it had sold 1,270,000 shares in the listed Indian automotive manufacturer, Eicher Motors Limited, for an amount totaling approximately SEK 2.5 billion. The divestment of shares has no effect on ownership or the development of the longstanding joint venture, VE Commercial Vehicles. The sale generated a capital gain of SEK 2,471 M, which impacted operating income in the Trucks segment in the first quarter of 2015.

Annual General Meeting of AB Volvo

The Annual General Meeting of AB Volvo held on April 1, 2015, approved the Board of Directors' motions that a dividend of SEK 3.00 per share be paid to the company's shareholders.

Matti Alahuhta, James W. Griffith, Kathryn V. Marinello, Hanne de Mora, Anders Nyrén, Carl-Henric Svanberg, Olof Persson and Lars Westerberg were reelected as members of the Board. Martina Merz and Eckhard Cordes were elected as new members of the Board. Carl-Henric Svanberg was reelected as Chairman of the Board.

Carl-Olof By, representing AB Industrivärden, Lars Förberg, representing Cevian Capital, Yngve Slyngstad, representing Norges Bank Investment Management, Håkan Sandberg, representing Svenska Handelsbanken, SHB Pension Fund, SHB Employee Fund, SHB Pensionskassa and Oktogonen, and the Chairman of the Board were elected members of the Election Committee.

A remuneration policy for senior executives was adopted in accordance with the Board of Directors' motion.

Detailed information about the events is available at www.volvogroup.com

NOTE 1 | ACCOUNTING PRINCIPLES

The Volvo Group applies International Financial Reporting Standards (IFRS) as endorsed by the EU. The accounting principles adopted are consistent with those described in the Volvo Group Annual Report 2014 note 1 (available at www.volvogroup.com). There are no new accounting principles applicable from 2015 that significantly affects the Volvo Group.

This interim report has been prepared in accordance with IAS 34 Interim Financial Reporting and the Swedish Annual Accounts Act.

The parent company applies the Swedish Annual Accounts Act and RFR 2 Reporting for legal entities.

NOTE 2 | RISKS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

All business operations involve risk – managed risk-taking is a condition of maintaining a sustained favorable profitability. Risk may be due to events in the world and can affect a given industry or market. Risk can be specific to a single company. Volvo works continuously to identify, measure and manage risk, and in some cases Volvo can influence the likelihood that a risk-related event will occur. In cases in which such events are beyond Volvo's control, the aim is to minimize the consequences.

The risks to which the Volvo Group is exposed are classified into three main categories:

External-related risks – such as the cyclical nature of the commercial vehicles business, intense competition, changes in prices for commercial vehicles and government regulations;

Financial risks – such as currency fluctuations, interest levels fluctuations, valuations of shares or similar instruments, credit risk and liquidity risk and;

Operational risks – such as market reception of new products, reliance on suppliers, protection and maintenance of intangible assets, complaints and legal actions by customers and other third parties and risk related to human capital.

For a more elaborate account of these risks, please refer to the Risk Management section on pages 83-85 in the Volvo Group Annual Report 2014 (available at www.volvogroup.com).

Risk updates for the period

Short-term risks, when applicable, are also described in the respective segment section of this report.

An increase in demand could potentially result in delivery disturbances due to suppliers' financial instability or shortage of resources.

Uncertainty regarding customers' access to the financing of products in emerging markets might have a negative impact on demand.

Volvo verifies annually, or more frequently if necessary, the goodwill value of its business areas and other intangible assets for possible impairment. The size of the surplus value differs between the business areas and they are, to a varying degree, sensitive to changes in the business environment. Instability in the business recovery and volatility in interest and currency rates may lead to indications of impairment.

The reported amounts for contingent liabilities reflect a part of Volvo's risk exposure. Total contingent liabilities as of March 31, 2015, amounted to SEK 16.6 billion compared to SEK 15.9 billion as of December 31, 2014. The gross exposure of SEK 16.6 billion is partly reduced by counter guarantees and collaterals. A significant part of the contingent liabilities are related to credit guarantees issued as a result of sales in emerging markets, in particular sales of construction equipment in China, where SEK 149 M was recognized as cost for expected future credit losses in China in the first quarter by Volvo Construction Equipment.

Please refer to the Volvo Group Annual Report 2014 note 21 for a description of provisions for legal proceedings and investigations and note 24 for a description of the nature of contingent liabilities including information on the legal proceedings and investigations that the Group is currently involved in and subject to.

The legal proceedings and investigations mentioned in the Volvo Group Annual report 2014 are progressing but no material change has occurred in these matters in the first quarter 2015 compared to the descriptions provided in note 21 and note 24 of the Volvo Group Annual Report 2014.

NOTE 3 | CORPORATE ACQUISITIONS AND DIVESTMENTS

Acquisitions and divestments

In the beginning of January 2015 Volvo Group completed the acquisition of 45% of the shares in Dongfeng Commercial Vehicles Co., Ltd, DFCV, in China. The ownership in DFCV is classified as an associated company and consolidated with the equity method and included in the Trucks segment. The result of DFCV is, from the beginning, included in the Volvo consolidation with a time lag of one month. When Volvo and DFCV have aligned the book closing procedures a catch up will take place and the result will then be recognized without a time lag. Consequently, when the catch up occurs, the result of four separate months will be included within one quarter.

The purchase consideration amounted to approximately SEK 7 billion and is recognized as Investments in joint

ventures and associated companies within Financial assets.

The Volvo Group divested properties in Belgium and Sweden during the first quarter, resulting in a positive impact on operating income of SEK 281 M recognized in the segment Corporate functions, Group functions & Other.

Volvo has not made any other acquisitions or divestments during the first quarter that have had a significant impact on the Volvo Group.

Assets and liabilities held for sale

Assets amounting to SEK 244 M classified as held for sale at the end of the first quarter 2015, mainly pertain to planned property divestments and divestment activities within the efficiency program.

NOTE 4 | CURRENCY AND FINANCIAL INSTRUMENTS

Fair value of financial instruments

Valuation principles and principles for hedge accounting for Volvo Group financial instruments, as described in Volvo Group Annual Report 2014 Note 30 (available at volvogroup.com), have been consistently applied throughout the reporting period.

Financial instruments in the Volvo Group reported at fair value through profit and loss consist mainly of marketable securities (see balance sheet) and interest-, currency- and raw material derivatives. Derivatives with positive fair values amounted to SEK 2.9 billion and derivatives with negative fair values amounted to SEK 3.1 billion as of March 31, 2015. The derivatives are accounted for on

gross-basis, with the exception of derivatives with positive fair values amounting to SEK 0.9 billion, netted against a fair value of a loan of negative SEK 0.9 billion, related to hedge accounting.

Financial liabilities valued at amortized cost, reported as Current and non-current bond loans and other loans, amounted to SEK 153.9 billion in reported carrying value with a fair value of SEK 157.2 billion. In the Volvo Group consolidated financial position, financial liabilities include loan-related derivatives with negative fair values amounting to SEK 2.1 billion.

NOTE 5 | TRANSACTIONS WITH RELATED PARTIES

Sales to associated companies amounted to SEK 577 M (539) and purchases from associated companies amounted to SEK 539 M (383) during the first quarter of 2015. As of March 31, 2015, receivables from associated companies amounted to SEK 416 M (598) and liabilities to associated companies to SEK 511 M (510). Sales to joint

ventures amounted to SEK 336 M (159) and purchases from joint ventures amounted to SEK 156 M (96) during the first quarter of 2015. As of March 31, 2015, receivables from joint ventures amounted to SEK 128 M (178) and liabilities to joint ventures to SEK 76 M (78).

NOTE 6 | EFFICIENCY PROGRAM

Strategic program 2013-2015

The Volvo Group's current strategic program for the period 2013-2015 is ongoing with the overall aim to improve the profitability of the Volvo Group. The ambition is to reduce the Group's structural costs by SEK 10 billion and have all activities implemented by the end of 2015, resulting in a full-year savings-effect in 2016.

The total restructuring charges are expected to amount to approximately SEK 6-7 billion. A significant part of the restructuring charges still to be recognized, currently amounting to SEK 2-3 billion, are expected to impact earnings in 2015. The non-cash portion of the total restructuring charges is expected to be approximately SEK 1.5-2.0 billion.

As of the third quarter 2013 operating cost related to the efficiency program is presented separately, when relevant for operational follow-up. As a result, in this report operating income and operating margin is presented both including and excluding restructuring charges. The program includes all restructuring cost, not only cost that meet the definition of restructuring provisions. The cost is recognized as Other operating income and expense in the Group's Income statement.

In the first quarter 2015, SEK 229 M related to the efficiency program is presented separately. The costs are mainly related to the optimization of the truck manufacturing in Europe and Volvo CE.

Follow-up of the program

SEK bn	2012	2013	2014	Q1 2015*	Target reduction 2016 vs 2012

PARENT COMPANY

During the first quarter dividend from the associated company Deutz AG was received of SEK 35 M. Slightly more than half of AB Volvo's holding in the listed company Eicher Motors Limited was divested which resulted in a capital gain of SEK 2,471 M. Reversal of revaluation to market value of the divested holding in Eicher Motors Limited of SEK 2,230 M, together with revaluation of the remaining holding of SEK 340 M is recognized in other comprehensive income and as a decrease in other shares and participations.

In January AB Volvo acquired 45% of the Chinese automotive manufacturer Dongfeng Commercial Vehicles Co., Ltd. The acquisition amounted to SEK 7,197 M, the holding is recognized as an investment in associated company.

Investments in tangible assets amounted to SEK 1 M (29).

Financial net debt amounted to SEK 41,286 M (35,967) at the end of the first quarter.

AB Volvo (publ) is obliged to disclose the information provided herein pursuant to the Securities Markets Act and/or the Financial Instruments Trading Act. The information was submitted for publication at 07.00 a.m. April 22, 2015.

This report contains forward-looking statements that reflect the Board of Directors' and management's current views with respect to certain future events and potential financial performance. Although the Board of Directors and the management believe that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, (i) changes in economic, market and competitive conditions, (ii) success of business and operating initiatives, (iii) changes in the regulatory environment and other government actions, (iv) fluctuations in exchange rates and (v) business risk management.

This report does not imply that the Company has undertaken to revise these forward-looking statements, beyond what is required under the company's registration contract with Nasdaq Stockholm, if and when circumstances arise that will lead to changes compared to the date when these statements were provided.
